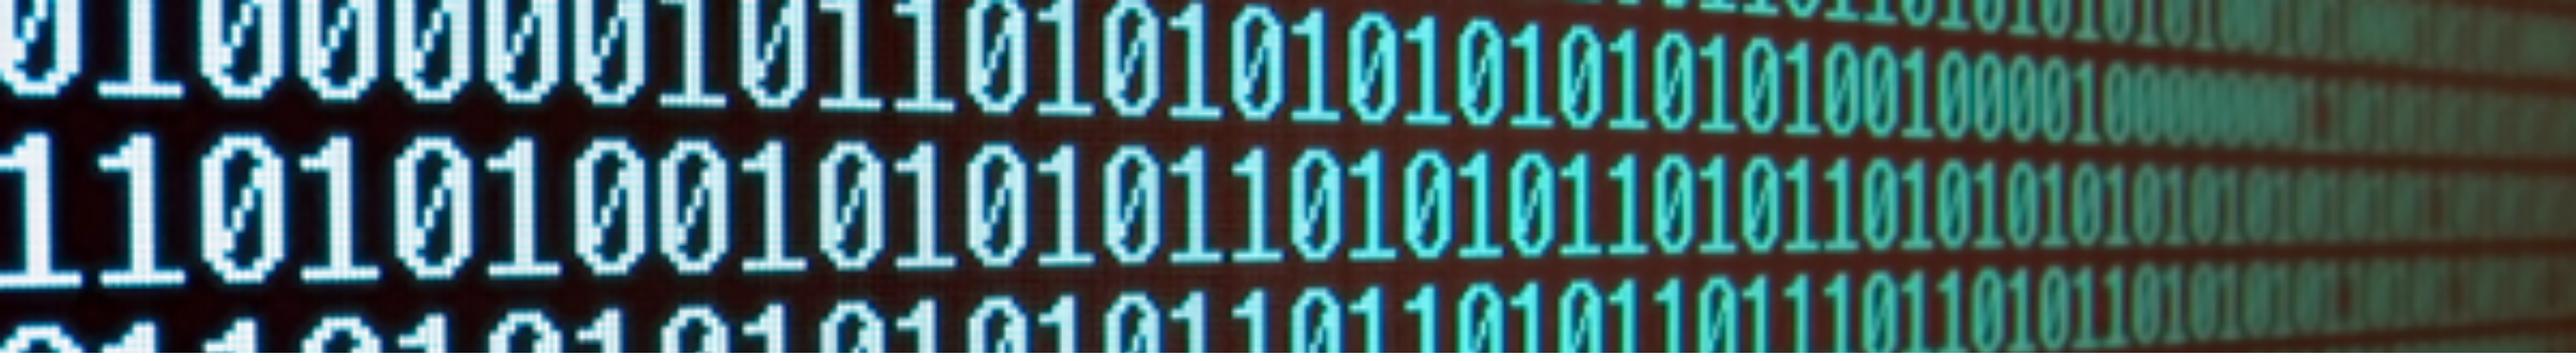
CIT 281 The Web Platform

# Project 4
# Due 1700 Sat 8/16



# Due: 1700 Sat 8/16.

## PROJECT REQUIREMENTS

1. **[100 pts] Push your Tweet Counter Web App to a Github Repo.**

   Turn your ~/Documents/repos/Projects/Chapter6/app/Twitter/ directory into a Git repo (with the "git init" command).

   Create a README.md file that describes your Twitter web app.

   Use Git to stage and commit your web app files to the local repo.

   Login to our cit281-14U Github organization site.

   Open your P4 repo overview page. You will see the two Git commands to "Push an existing repository from the command line."

   Use the commands to push your Twitter repo to Github.
